

1	Introduction	1
2	Introduction française	3
3	Brownian Motion	6
3.1	The Brownian motion discovery	6
3.2	Einstein's Brownian theory	7
3.3	The Langevin Equation	11
3.4	Numerical simulation of bulk Brownian motion	16
3.5	Conclusion	22
4	Particle Characterization and Tracking Using Optical Interferences	23
4.1	Introduction	23
4.2	Reflection Interference Contrast Microscopy	23
4.3	Lorenz-Mie theory	26
4.4	Rayleigh-Sommerfeld back propagation	38
4.5	The experimental setup	40
4.6	Optical forces	41
4.7	The experimental procedure	45
5	Stochastic Inference of Surface-Induced Effects Using Brownian Motion	53
5.1	Confined Brownian motion theory	53
5.2	Experimental study	83
5.3	Conclusion	102
6	Other applications of the method	103
6.1	Elastohydrodynamic lift near a soft wall	103
6.2	Close wall stuck motion	108
6.3	Long-time 4th cumulant	112
6.4	Sample ageing	115
7	Conclusion	117
8	Conclusion en français	119
A	Appendix	121
A.1	Simulation of the full Langevin equation	122
A.2	Tracking procedure using pylorenzmie	132
A.3	Stochastic inference of surface-induced effects using Brownian motion . . .	145
A.4	Data Analysis procedure	151
